SOLUTION PROVIDER

COREVAULT™ INFRASTRUCTURE PROTECTION CONTAINERS

Reusable operating assets that improve handling throughput and compliance.

COLD AISLE COMPONENT CASES

Swap it. Pack it. Ship it.

Reusable cases that take GPUs, switches, compute trays, power shelves and CDUs from the aisle to the dock and back, with no boxes to build and no cardboard in the data hall.

- **Swap and Ship in One Move.**
  Pull the component in the aisle and slide it straight into the case. No repacking at the dock and less time out of service.
- **Built for Tight Aisles.**
  Engineered for safe, efficient handling where your technicians actually work. Pallet jack and forklift ready, so no one hand carries heavy hardware.
- **Keeps Cardboard Out of the Data Hall.**
  A clean, reusable case replaces boxes, foam and dunnage. Nothing to unpack, collect or throw away in the white space.
- **Know What's in Every Case.**
  Dedicated cases and documentation holders keep new, returned, repaired and redeployed equipment sorted for reverse logistics / RMA.
- **Reuse, Not Refuse.**
  Built for 7+ years of life and unlimited use cycles. Constructed from aluminum, galvanized steel and HDPE. Less packaging to buy, store and throw away.
- **OCP Accepted®.**
  Recognized by the Open Compute Project and aligns with Open Rack V3 (ORV3) specifications.

OCP ACCEPTED

Providing INNOVATIVE SOLUTIONS to complex problems™

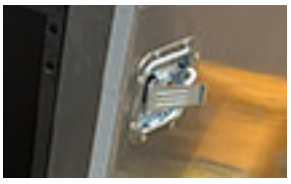
DATA CENTER SOLUTIONS

Cold Aisle Component Cases are one piece of a complete Americase data center lineup. Wherever your hardware moves, we've built something to protect it.

Aircraft-grade aluminum construction for durability and multiple use cycles.



Heavy-duty hardware for security and reliability. Lockable for added security.

Custom-fitted interior minimizes shock and vibration.

Designed to be liftable by forklift or hoist, as required by product specifications.

Documentation holders for easy tracking and identification.

- **Li-Ion BBU / UPS Cases.**
  Moving or storing batteries, too? Our reusable cases are engineered to move batteries from the OEM to your facility and even transport end-of-life batteries, in the same case.
- **Reusable Rack Packaging.**
  Ship fully loaded racks from integrator to data hall, or between sites.
- **Li-ion BBU / UPS Cabinets.**
  Our mobile cabinets roll battery units between halls, staging areas and the dock without anyone lifting them.

Backed by People Who Know Your Equipment

From first deployment through warranty returns and second life redeployment, our in-house engineering, testing, and regulatory compliance teams stand behind every case, with the test data and documentation your EHS and change control colleagues will ask for. Your team stays focused on moving equipment instead of chasing paperwork.

Americase is part of Americase International, a globally recognized, fully integrated enterprise that shapes and delivers protection, containment, and mitigation solutions for high value and dangerous goods. Americase, HazMat Safety Consulting, and Fulcrum Testing are Americase International companies.
